

Plant Evolution

www.ornamentalgarden.com.au | 18th August 2014

When you think of evolution, you think of Darwin's theory of natural selection. It's a process that has shaped the world we live in today. But what if we could see evolution in action? What if we could witness the birth of a new species? Well, we can. And it's happening right now in a garden in Chicago.
